

WELCOME TO PYTHON CLASS DAY 6

IF STATEMENTS

If something is true, then you do one thing. If it's not true, you do something else.

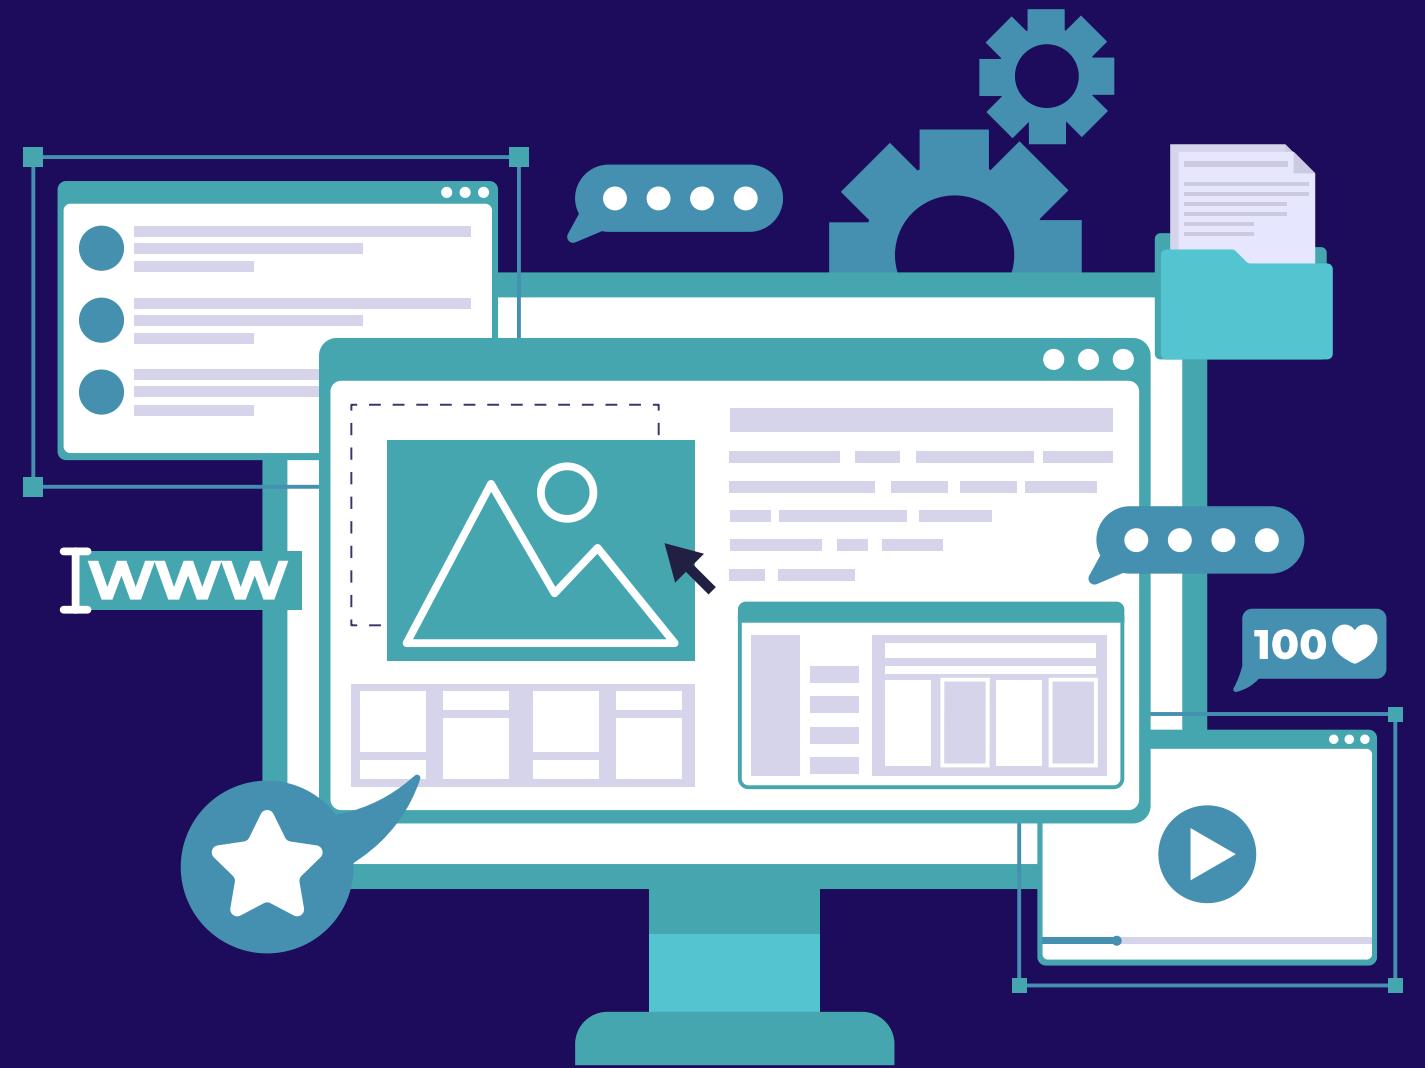

WHICH FRUIT?

It's Story Time

cave of wonders

MANGO

What should I eat first?

IF . . .

use if statements to help make
decisions in your programs

```
fruit = "mango"
```

```
if fruit == "blueberry":  
    print("I will eat the blueberry!")  
else:  
    print("I will eat the mango")
```

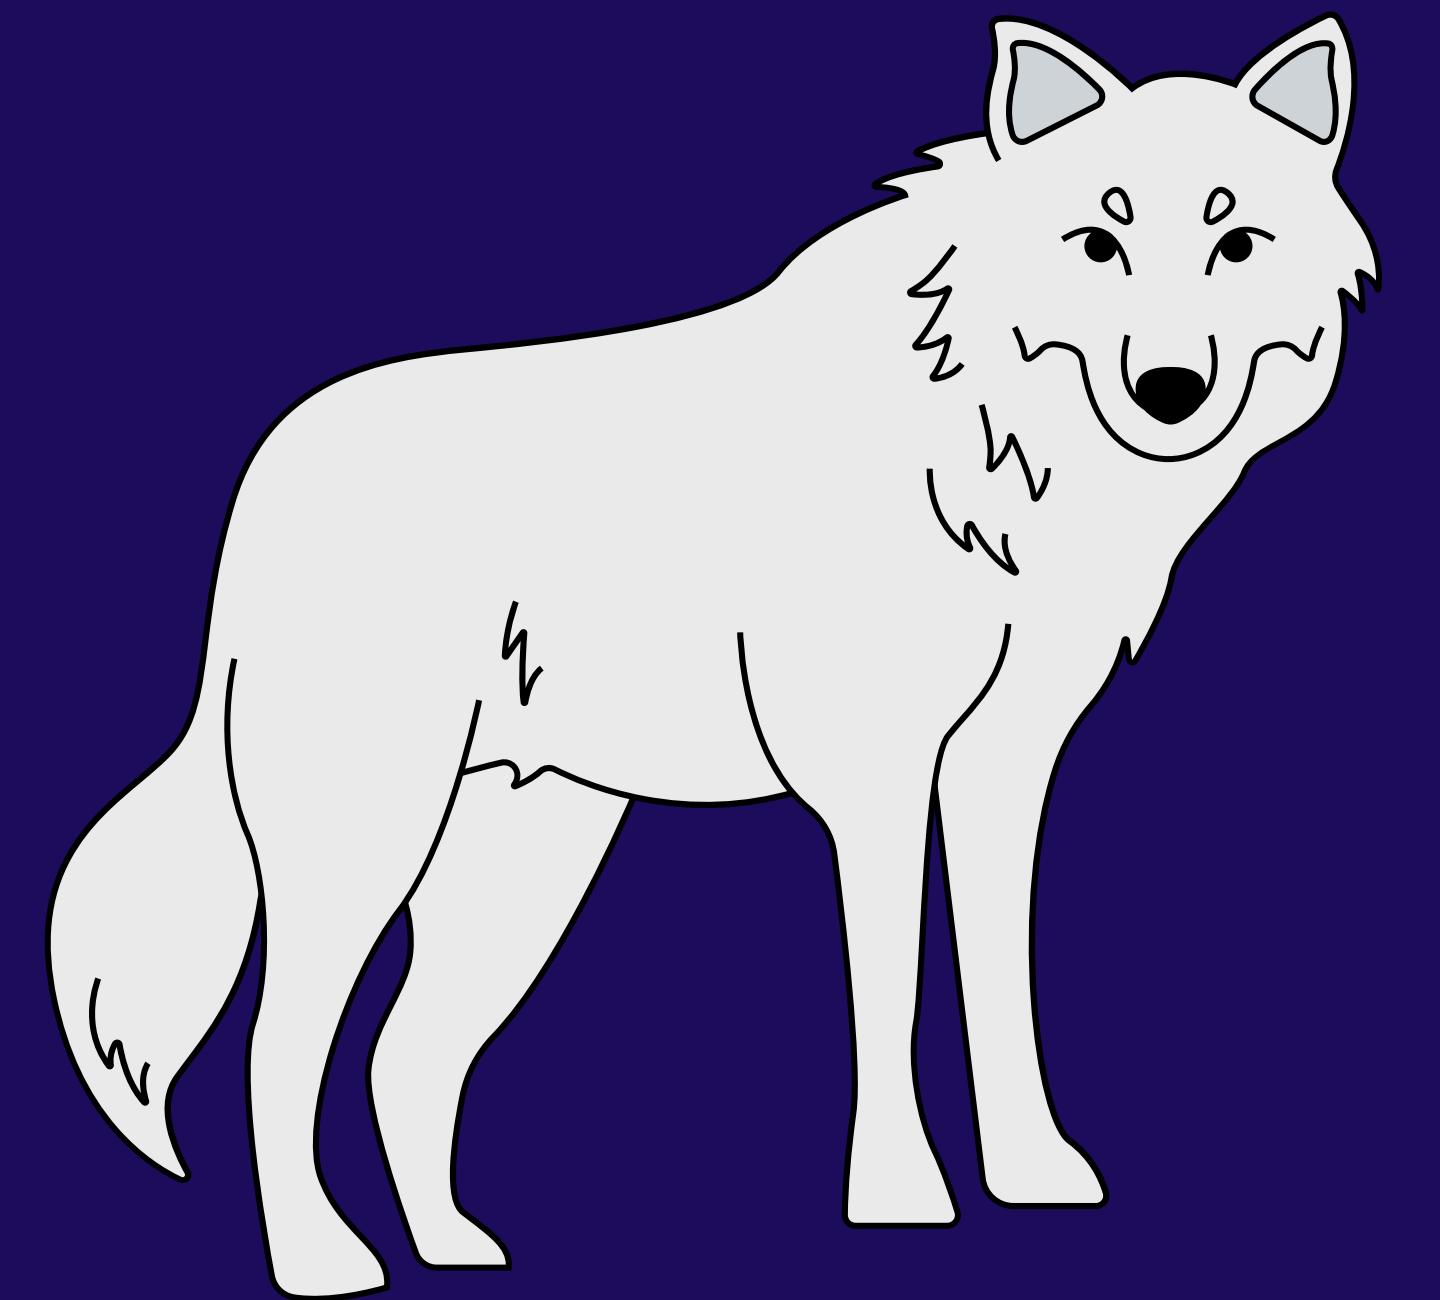

I will eat the mango

```
fruit = input("Which fruit do you want to eat: apple or banana? ")
```

```
if fruit == "apple":  
    print("You will eat the apple!")  
else:  
    print("You will eat the banana!")
```

which fruit do you want to eat? apple or banana: apple
you will eat the apple

And that's how she made her big decision! Remember,
you can use if statements to help make decisions in your
programs too!

I will ask you
questions
