

WELCOME TO PYTHON CLASS DAY 4

Operators

symbols used to perform operations

plus

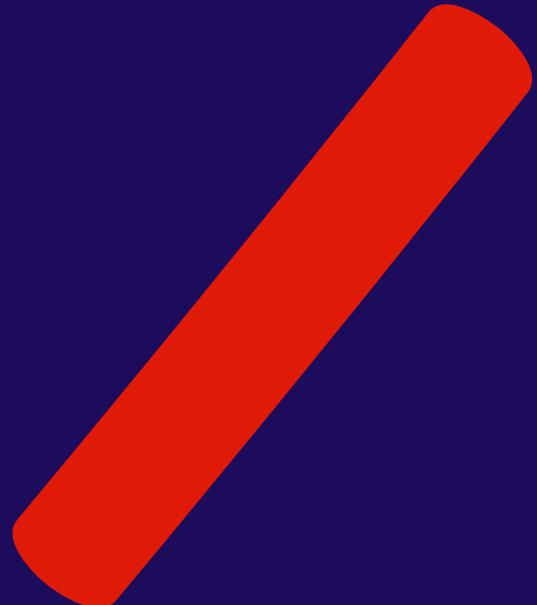

minus

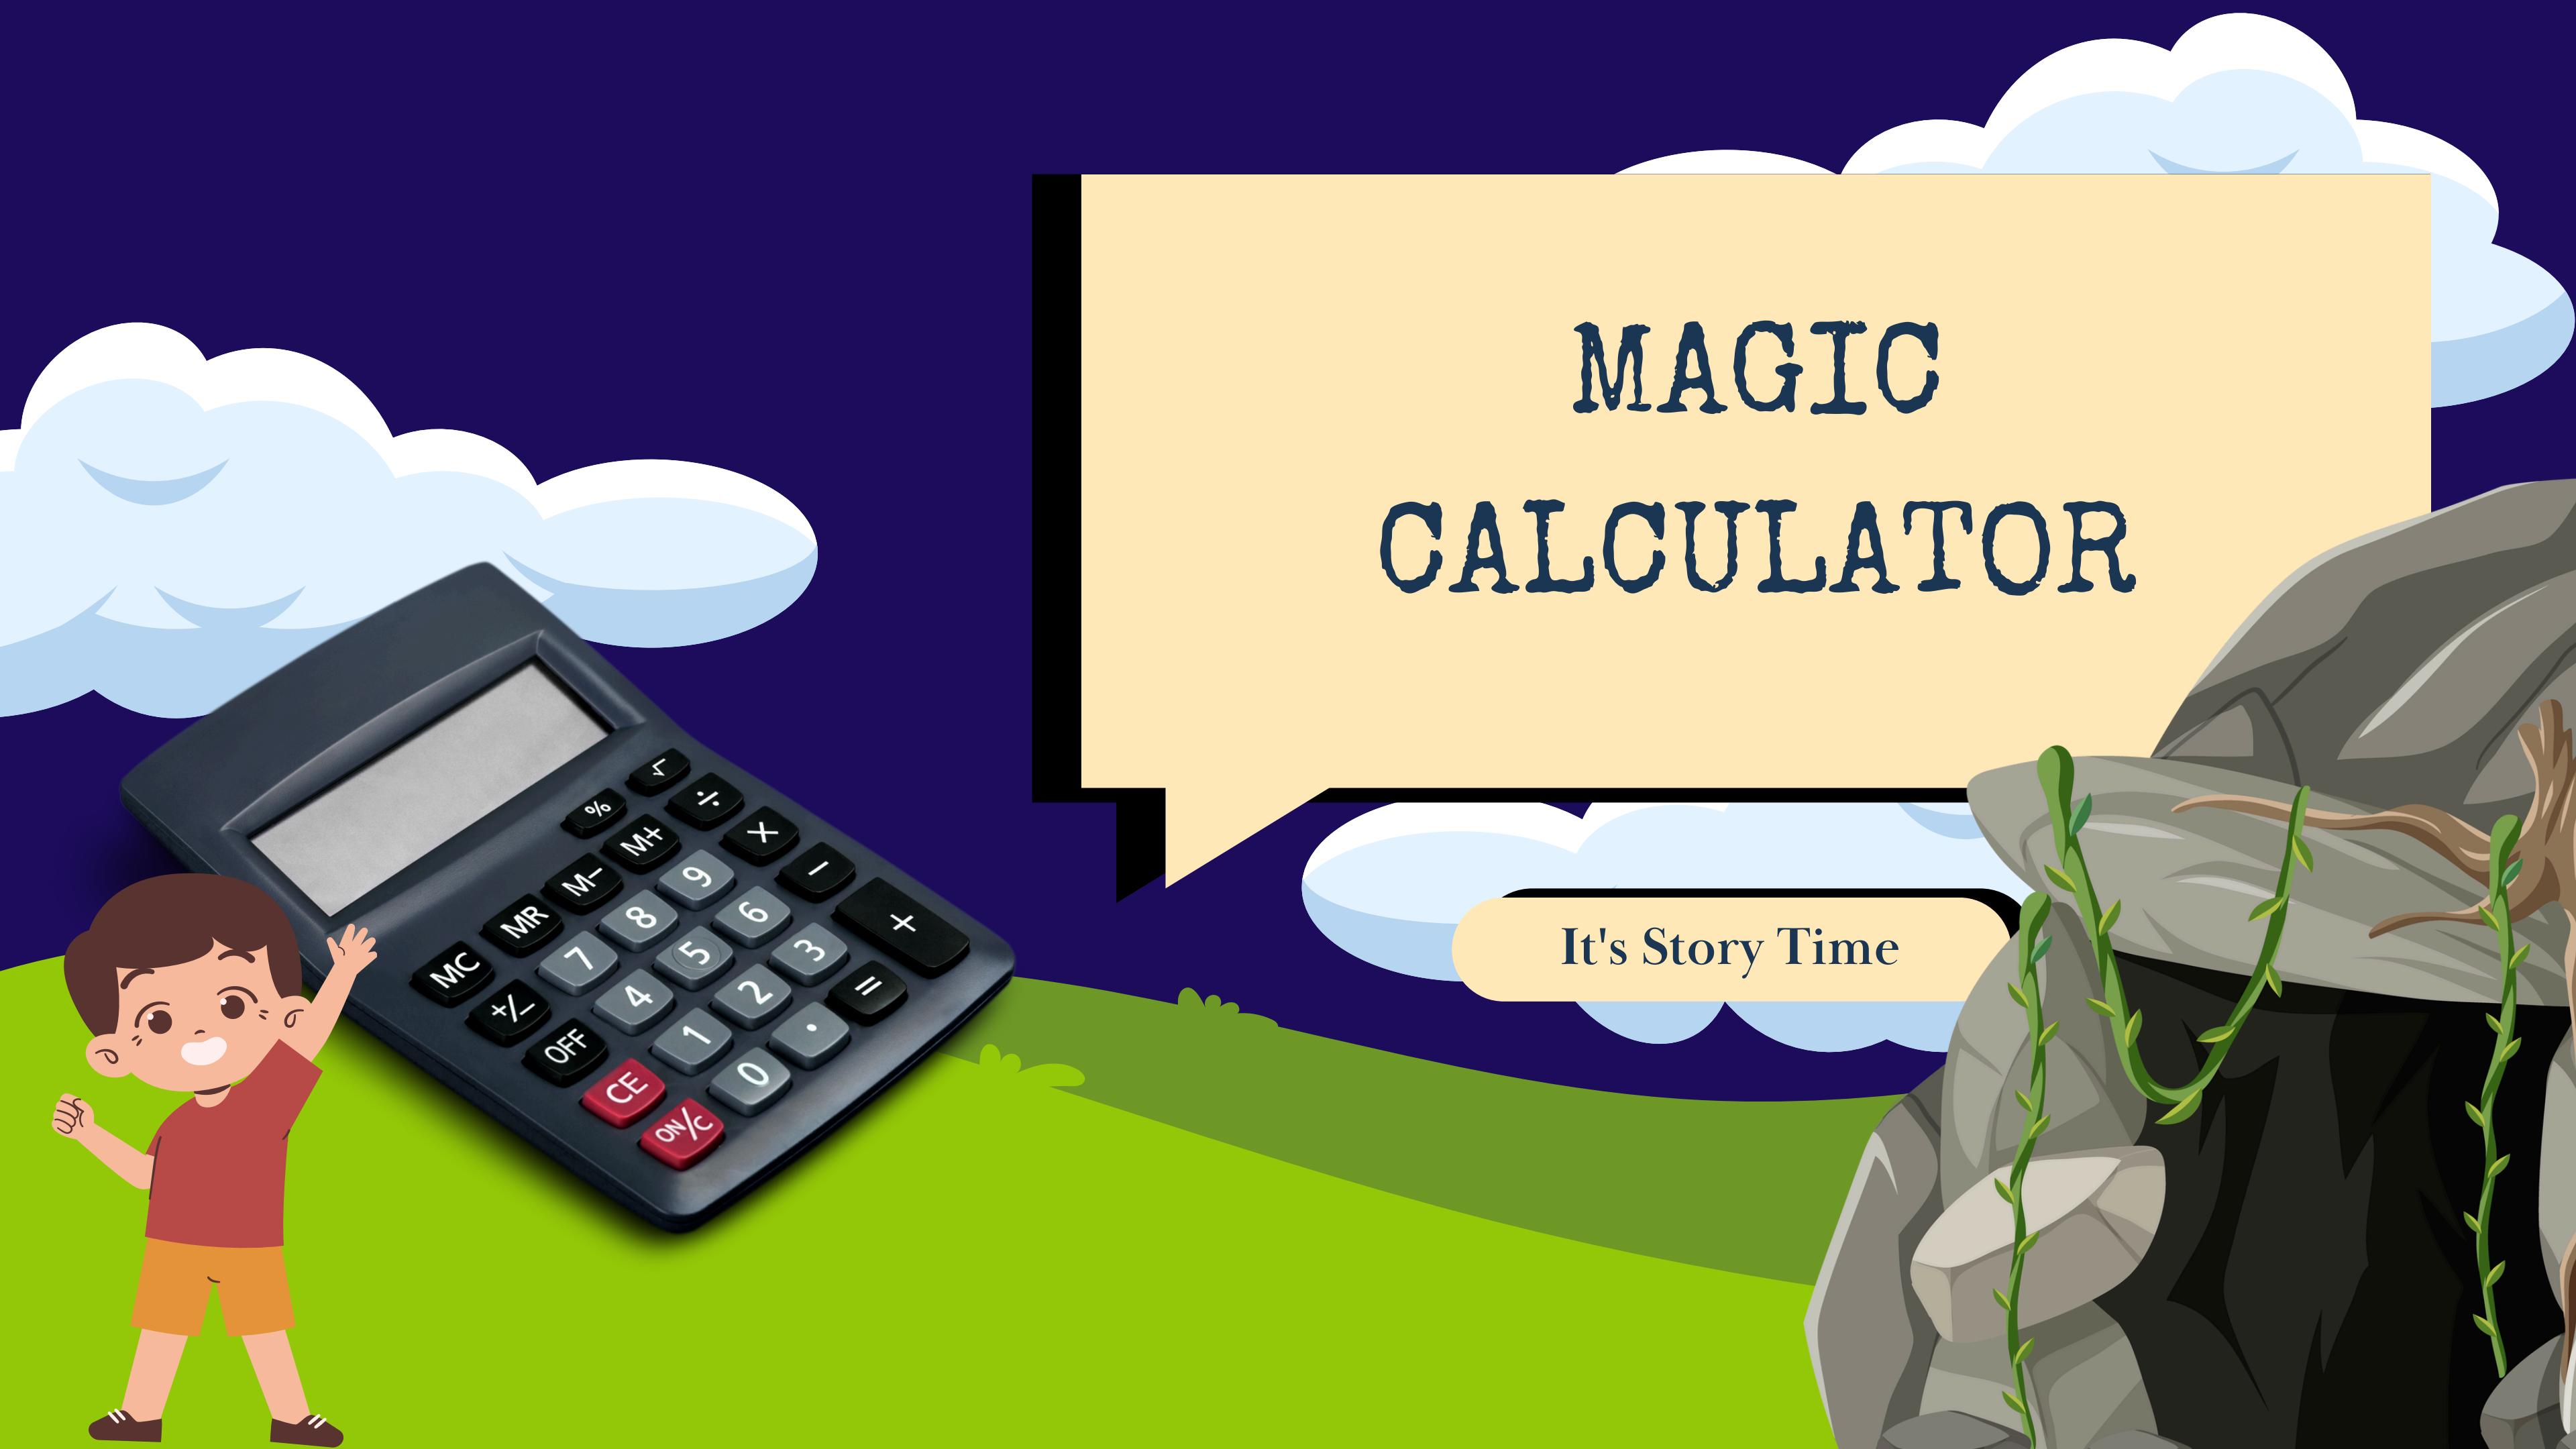

multiply

divide

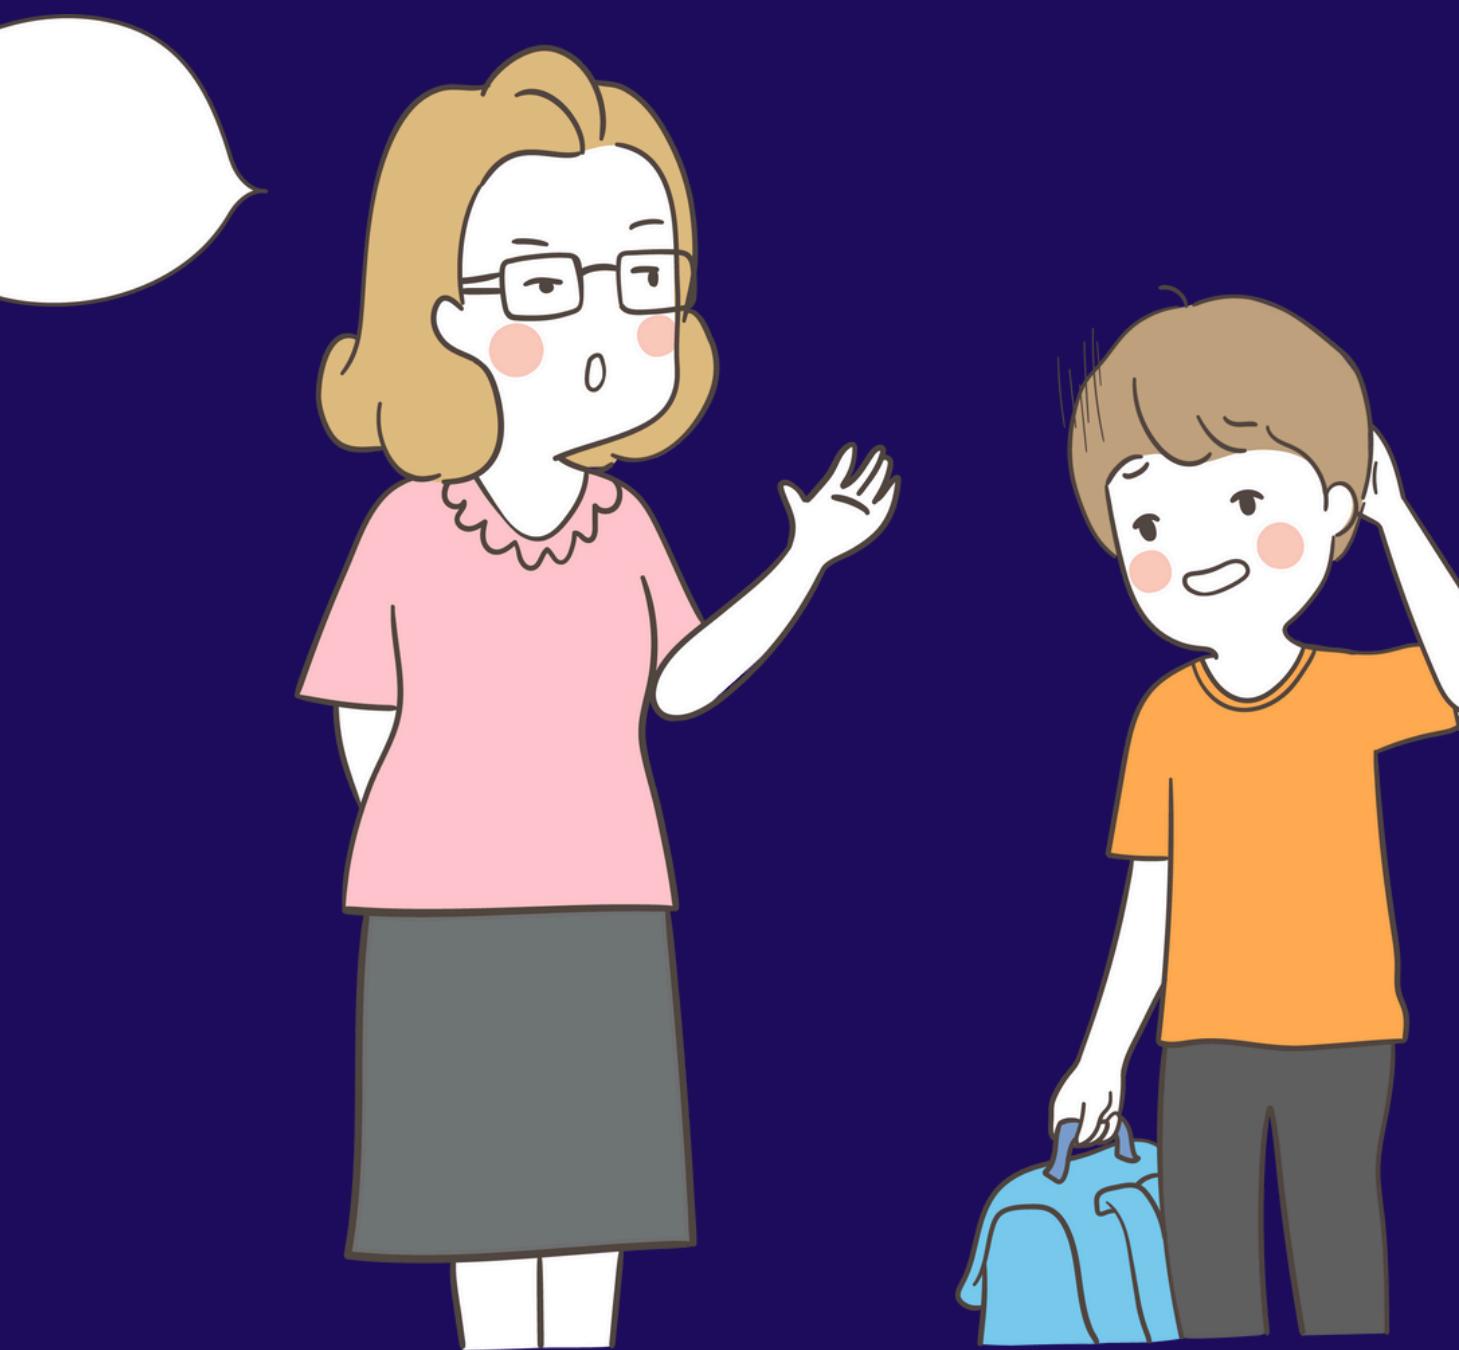

MAGIC CALCULATOR

It's Story Time

teacher gives joy , math
homework as a punishment

$1+2=$

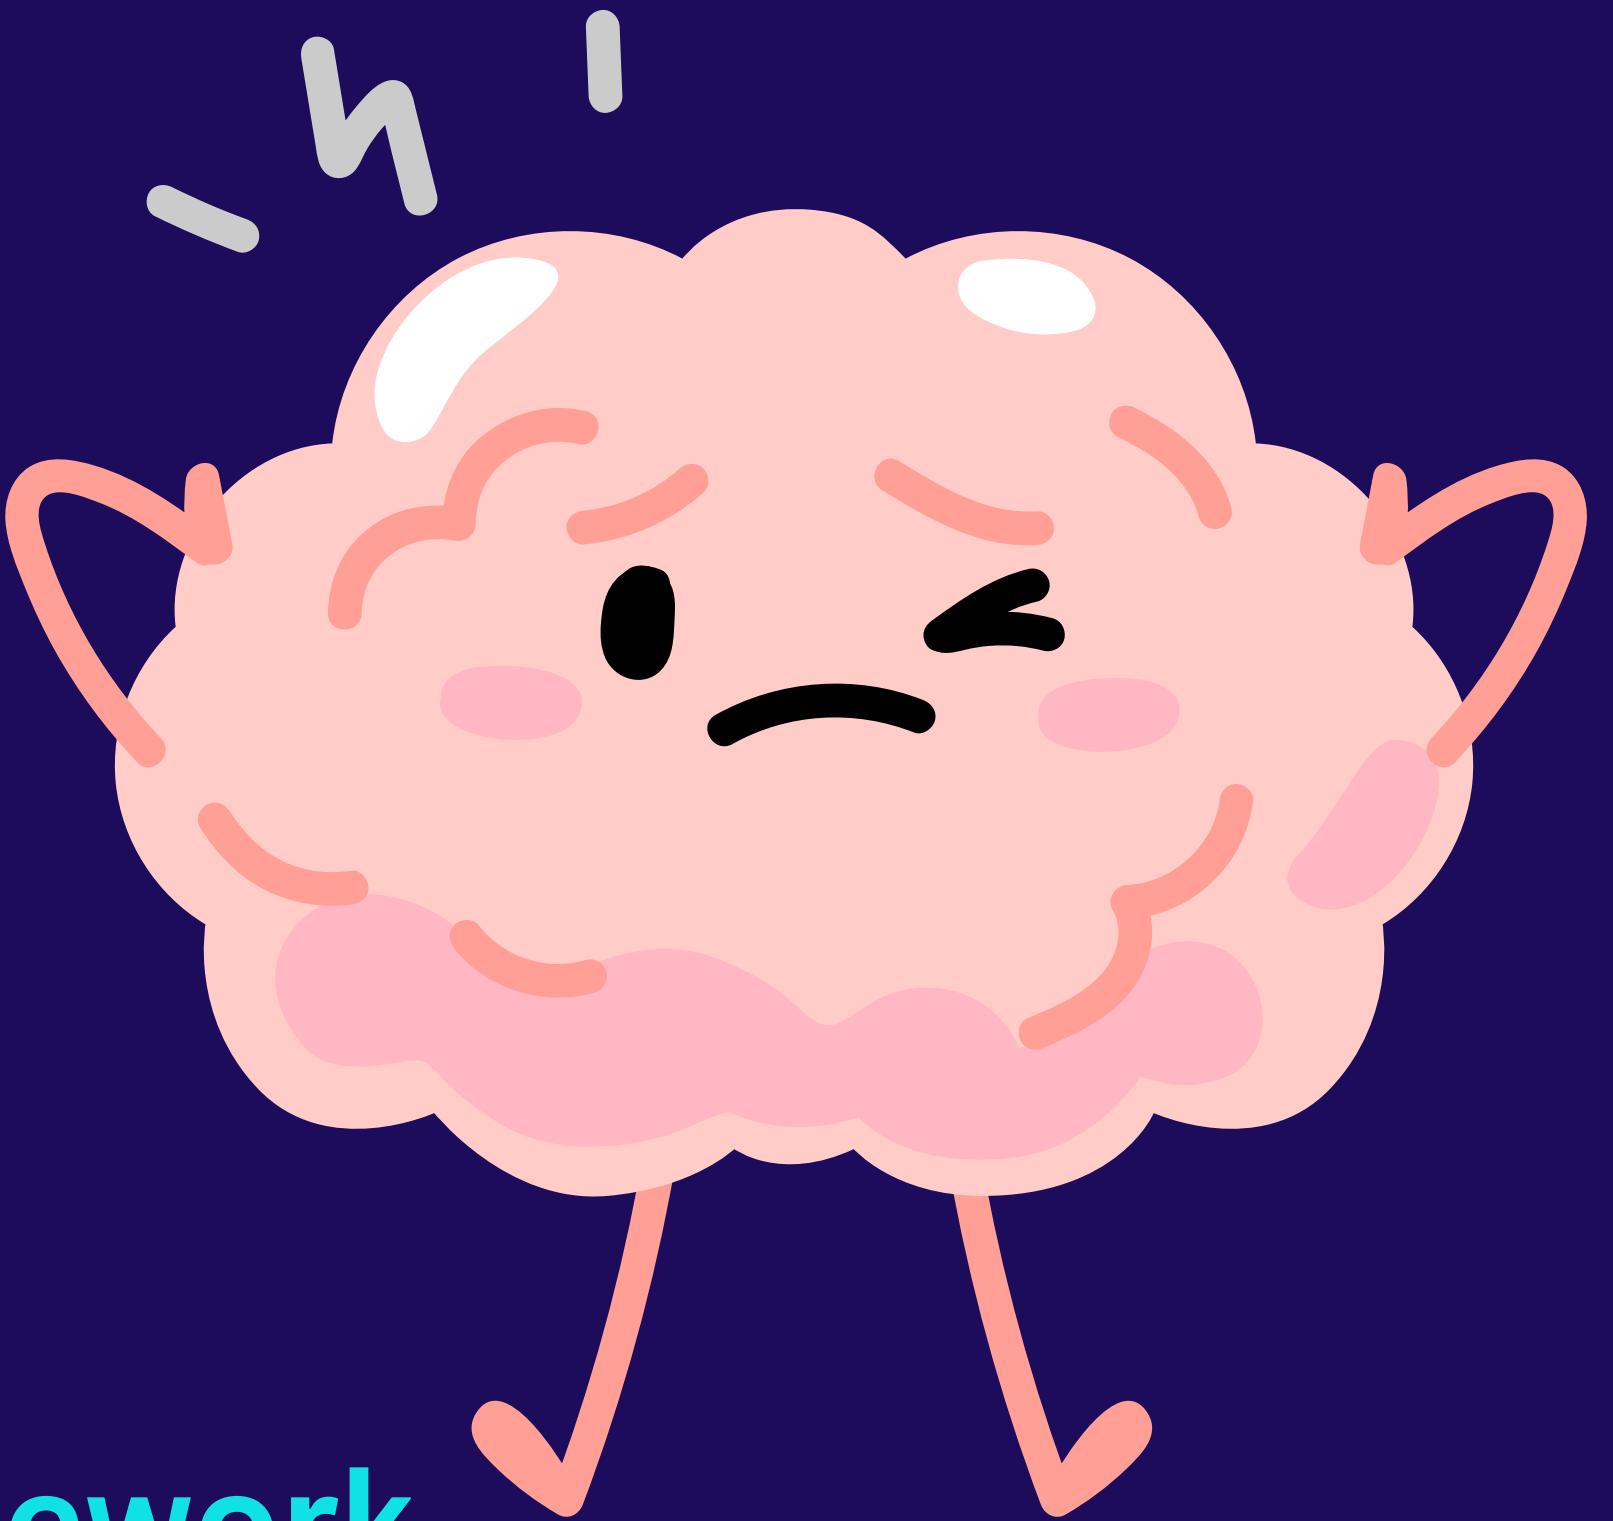

$3+4=$

$3-1=$

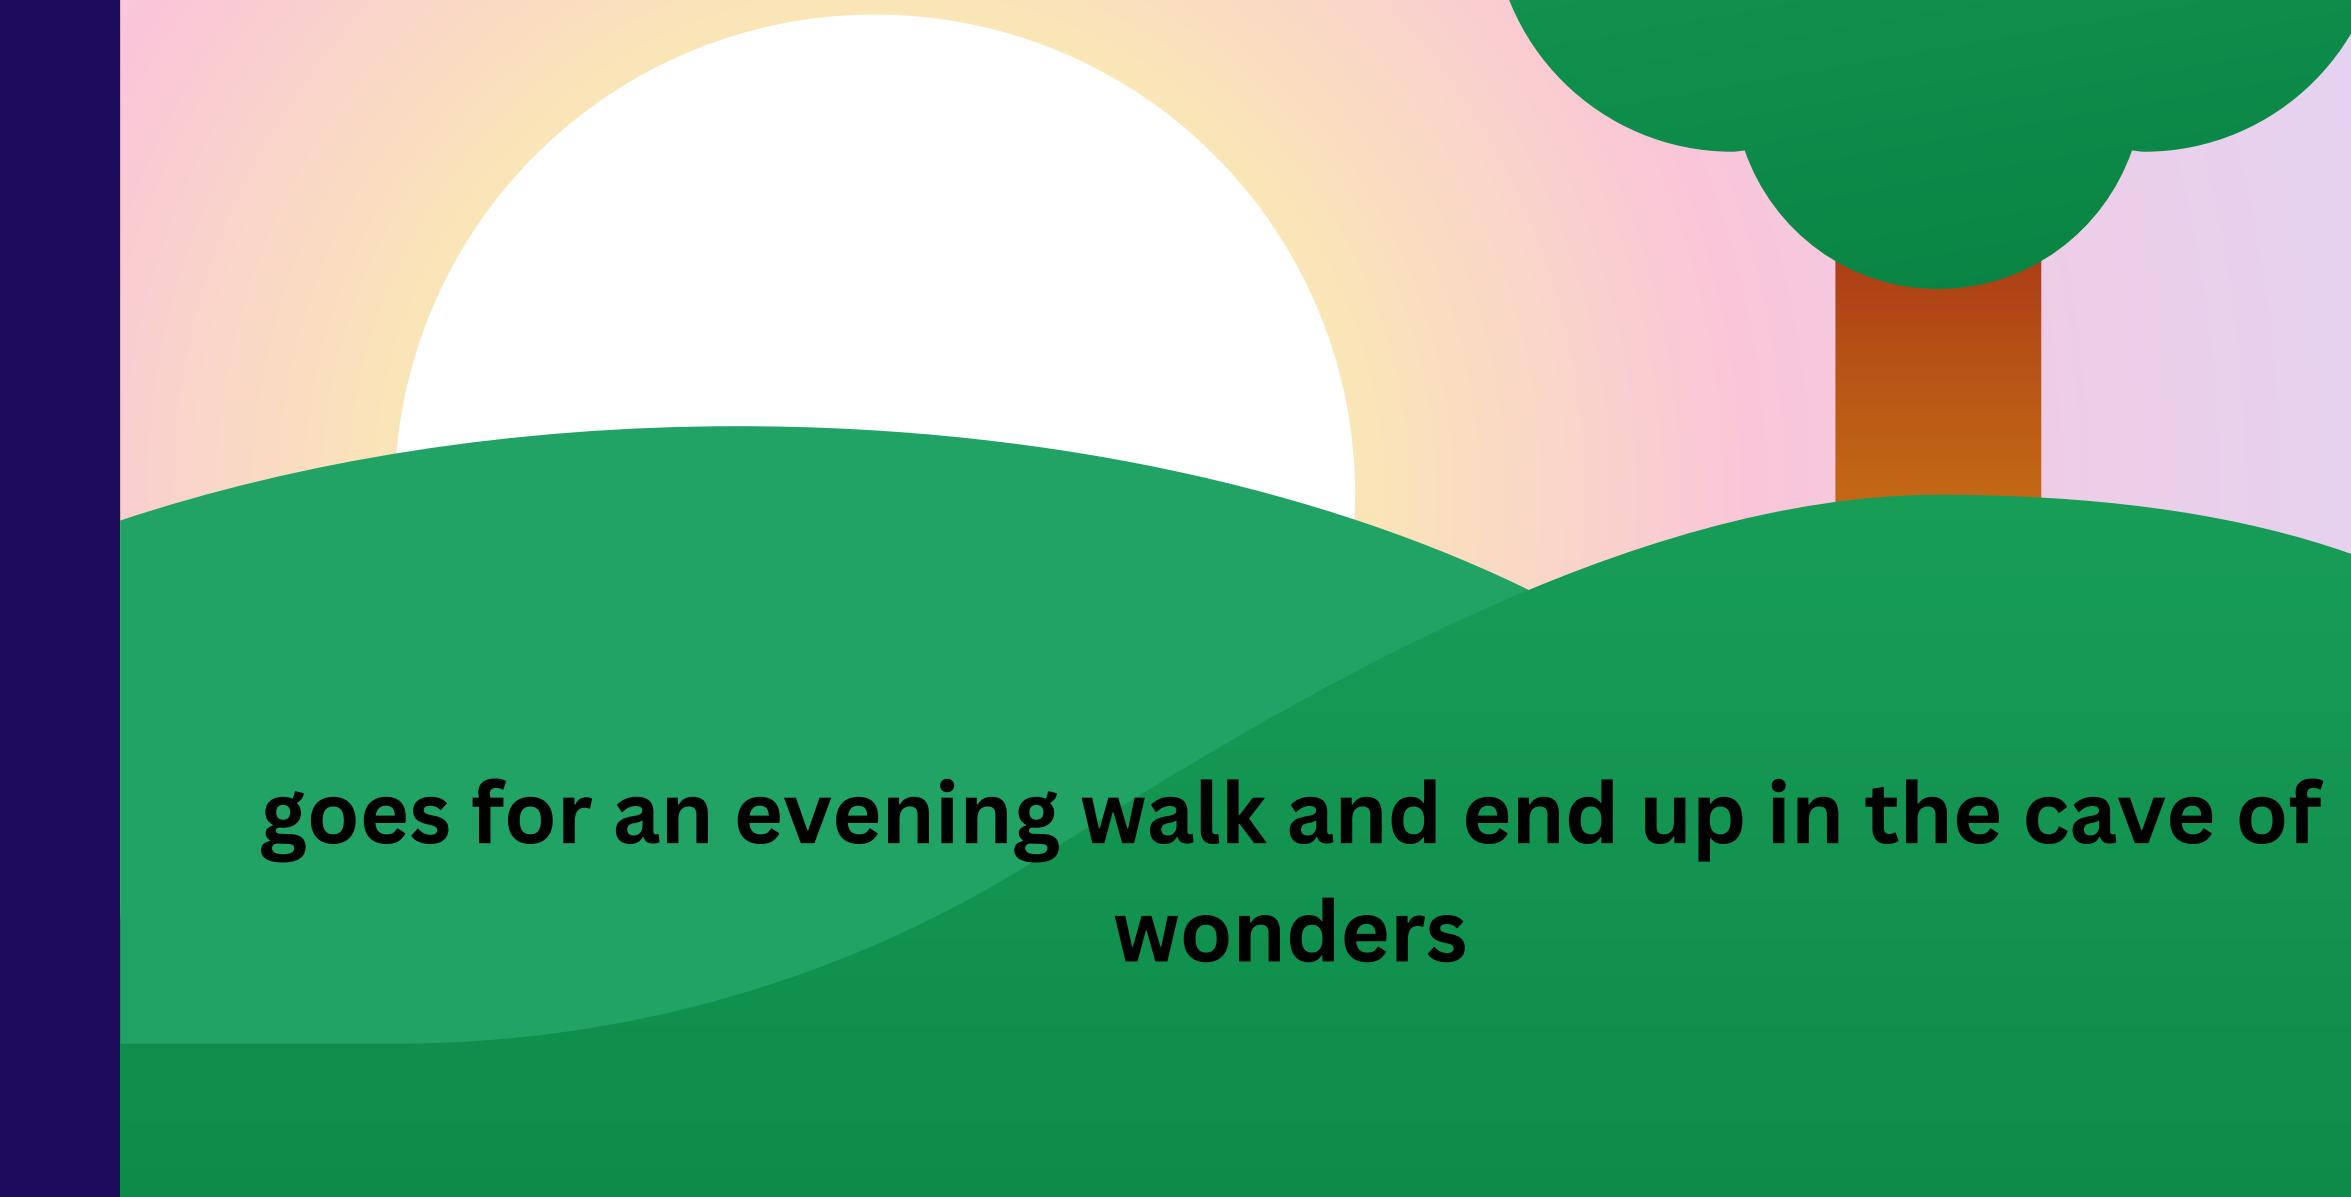

$2*1=$

$4/2=$

JOY's brain

I hate to do homework

**goes for an evening walk and end up in the cave of
wonders**

cave of wonders

finds a magic calculator

Joy uses magic calculator to
do his homework

$1+2=3$

$3+4=7$

$4-1=3$

$5*1=5$

$4/2=2$

teacher is impressed!

Addition operator +

Subtraction operator -

multiplication operator *

division operator /

#easiest way to calculate

10⁻³

7

#by using variable, operator and function

```
result = 2 + 2
```

```
print( result )
```
